ENGLISH SAMPLE BRIEF · V0.2 · 3 NOVEMBER 2026

Curriculum Observatory

What changed in a degree's requirements, course content or approved options?

Compare official curriculum versions with course-level evidence, conditions and document timing kept together.

Public preview scope

13 selected cases from six universities. Full-edition counts describe the underlying research, not the size of this public sample.

This brief presents two selected cases. The downloadable public sample contains 13 cases.

Underlying research edition

20 universities in the historical baseline · 6 universities with detailed research · 29 programme-document versions · 99 selected course-version records

Interpretation limits

- Selected official programme and course texts, not a census of all courses at these institutions.
- Five institutions have five observed annual editions; MIT's 2025/26 central annual programme rules remain a documented gap.
- Catalogue wording and eligibility do not measure teaching, student uptake or learning outcomes.
- Academic-year versions, entry cohorts and retrieval dates are distinct; credits stay in each institution's own units.

EDINBURGH · DOCUMENTED CONTINUITY

Machine learning inside a required data science course

2022/23 → 2026/27

Across five observed editions, Edinburgh places INFR08030 in the second-year compulsory group. Its description includes supervised machine learning, inference and algorithmic bias. The separate INFR10086 Machine Learning course remains an option.

Observed editions
2022/23–2026/27; five editions

Whole-course credit
20 SCQF credits

Requirement
Second-year compulsory course

The credits belong to the whole course, not exclusively to AI. Annual catalogue versions are not one entry cohort; teaching, student uptake and learning outcomes were not measured.

EDINBURGH · REQUIREMENTS AND DELIVERY STATUS

A listed project option can have a non-delivery notice

2022/23 → 2026/27

Edinburgh lists SDP and EIP in a choose-20-credit project group through 2025/26, while the 2025/26 EIP page says it is not being delivered. In 2026/27, SDP is separately compulsory, with an approved Formula Student substitution route; EIP retains its non-delivery notice.

Project group
2023/24–2025/26

SDP separately compulsory again
2026/27

EIP non-delivery notice observed
2025/26 and 2026/27

Programme eligibility and delivery notices are different facts. A yearly notice does not establish permanent closure or actual teaching. The 2026/27 EIP page was retrieved again on 3 November 2026; it is not the earlier saved byte version.
