Metrace

ENGLISH SAMPLE BRIEF · V0.1 · 3 NOVEMBER 2026

India Deposit Rate Monitor

Which deposit quotes are comparable, and what does each date actually establish?

Research selected historical bank rate tables with customer, amount and tenor context attached to every quote.

Public preview scope

Three selected cases. The full edition contains 254 candidates and selected domestic retail INR deposit buckets covering a nominal 365-day point, plus 12 historical RBI policy-rate points.

This brief presents two selected cases. The downloadable public sample contains 3 cases.

Underlying research edition

6 banks · 188 accepted archive quote observations · 66 candidate observations held · 44 descriptive adjacent comparisons

Interpretation limits

- The 188 accepted observations include repeat captures; they are not 188 distinct rate changes.
- The scope is general-public domestic retail INR deposits; original tenor labels and amount thresholds remain authoritative.
- Sparse archives do not identify the first adjustment or prove that a dated PDF quote was active on its capture date.
- Comparisons are descriptive; causal monetary-policy pass-through, personalized returns and investment recommendations are outside scope.

SBI · DESCRIPTIVE QUOTE COMPARISON

SBI: the same posted-rate bucket moves from 6.50% to 6.25%

2025-05–2025-07 archives

Two SBI archive observations list 6.50% and 6.25% for the same general-public domestic INR deposit bucket: below INR 3 crore, one year to less than two years. The decrease is 0.25 percentage points.

Archive observations
31 May and 8 July 2025

Selected-column applicability dates
16 May and 15 June 2025

Quoted rates
6.50% → 6.25% per year

Matched amount bucket
Below INR 3 crore

Sparse observations do not identify the earliest actual adjustment. Column applicability dates do not prove when this tenor first changed. There is no causal policy pass-through or realized customer-rate inference; callability is not explicit in the selected table.

PNB · WITHIN-DOCUMENT TENOR COMPARISON

PNB: one year and 390 days have different quotes

2025-05 archive

The 26 May 2025 PNB archive lists 6.70% for one year, 6.80% for more than one year to 389 days, and 7.00% for 390 days in the same general-public Domestic/NRO table below INR 3 crore. Selecting the highest nearby-tenor rate would change the product being compared.

One year
6.70% per year

More than one year to 389 days
6.80% per year

390 days
7.00% per year

Selected-column applicability date
14 May 2025

This is a comparison within one document, not a rate-change event. The panel uses a nominal 365-day point but retains the bank's one-year label. A shared Domestic/NRO table does not establish terms for every non-resident product.
